Technical Skills

AI / LLM: LLM Output Evaluation, Prompt Engineering, Code Review for Model Training

Languages: C++, C#, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: ASP.NET Core MVC, Web API, EF Core, React.js, Bootstrap

Cloud & DevOps: Azure, AWS, Docker, Linux, Git, GitHub

Tools & Core CS: Power BI, Jira, VS Code, DSA, REST APIs

Languages Known: Telugu, Hindi, English, German

Experience

Research Participant

Jan 2026 – Present

Prolific

Remote

- Completed 300+ academic and industry research studies on the Prolific platform spanning linguistics, cognitive assessment, and AI/LLM behavior, including language-judgment tasks.
- Followed detailed study protocols and provided careful, consistent human judgments used as ground-truth data for research and model evaluation, maintaining a strong approval rate across submissions.

AASE Trainee -.NET Full Stack Development

Jun 2026 – Sep 2026

Accenture

Remote

- Completed Accenture's intensive .NET Full Stack Development (AASE) training: C#, OOP, LINQ, SOLID principles and design patterns, unit testing (NUnit, TDD/BDD), EF Core, and SQL Server data modeling.
- Gained hands-on exposure to Azure cloud fundamentals, Docker containerization, and Agile/DevOps (CI/CD) workflows in a capstone project.

Data Annotator

Nov 2024 – Jan 2025

Outlier AI

Remote

- Reviewed and annotated AI-generated responses at scale for logical consistency, factual accuracy, and code correctness, applying consistent human-grounded evaluation criteria.
- Designed high-quality prompts for English and coding tasks; awarded **\$700 USD** for consistently high-impact annotation contributions.

Projects

IT Service Desk Management System / .NET, EF Core, React, SQLite, Azure DevOps

Aug 2026

- Built a full-stack IT service request portal with a 3-layer architecture: EF Core 9 + SQLite data layer, ASP.NET Core Web API with 9 REST endpoints, and a React 19 frontend - supporting role-based access for users and admins.
- Implemented Context API-based authentication and route guarding in React, and set up an Azure DevOps CI/CD pipeline for automated build, test, and multi-stage (Dev/Staging/Production) deployment.

Student Mental Health & Depression Dashboard / Power BI, Data Cleaning

Mar 2025 – Apr 2025

- Built an interactive Power BI dashboard analysing mental health trends across 1,000+ student records (2023–2025), surfacing correlations between depression, CGPA, sleep, and financial stress.
- Applied data cleaning pipelines to ensure dataset integrity; designed intuitive visuals to communicate actionable insights to non-technical stakeholders.

RentMyCargo — Vehicle Rental Platform / React.js, JavaScript, HTML, CSS

Sep 2024 – Oct 2024

- Engineered a responsive SPA supporting bikes, cars, and cargo vehicles with real-time search, dynamic vehicle cards, and booking confirmation flows.
- Leveraged React hooks (`useState`, `useEffect`) for UI state and async rendering; ensured full mobile responsiveness and component reusability.

Achievements

- Solved **150+ DSA problems** on LeetCode.
- Awarded **\$700 USD** by Outlier AI for consistently high-impact AI annotation and code-review contributions.
- Completed **Madhyama & Prathmik** Hindi language certification exams (national proficiency standard).

Education

Lovely Professional University

B.Tech — Computer Science and Engineering / CGPA: 7.9

Punjab, India

Aug 2022 – Aug 2026
